AUTOMOTIVE DETAILER'S CLOTH

The Starfiber Auto Cloth (\$11) is designed with a waffle-weave fabric for better absorption than towels to dry your car in less time. Because you can dry your car without wringing the towel, it cuts your drying time in half. This towel can be used on interiors and exteriors, and it leaves a lint-free, non-streak shine. It also works great for removing wax quickly and easily. Aquastar Inc., (866)782-7342, www.starfibers.com

"I recommend the Starfiber Auto Cloth because it left a great shine and absorbed a lot water before needing to be wrung out."—Doyle Palmer, Cedar City, UT

"This cloth left no streaks and worked much better than the chamois I've used in the past."—Chris Bloom, Topeka, KS
