 STARFIBER®

AquaStar

N6755

AquaStar is launching two new products. The Smart Duster bends into any shape to reach difficult areas such as under beds, sofas, between appliances and on ceiling fans. The brush uses electrostatic fur to attract dust. The Starfiber Plush Cloth is an all-purpose cleaning cloth that can be used for dry dusting or wet for cleaning. It is made of Starfiber microfiber so it can be used with or without chemicals and comes in a variety of colors.
